SSEC achieves its goals by: (a) building awareness for science education among school leaders; (b) promoting Leadership and Assistance for Science Education Reform (LASER); (c) supporting the professional growth of K-12 teachers and school leaders; (d) developing exemplary K-12 curriculum materials and digital resources (including the comprehensive research-based science curriculum programs: Smithsonian Science for the Classroom; Science and Technology Concepts for Middle School; and Smithsonian Science for Global Goals); and (d) engaging in research. At the heart of SSEC’s work is the idea that all youth—regardless of gender, sexual orientation, geography, race, native language, ability, or socio-economic status—should be given the opportunities to learn about the socio-scientific issues that challenge us. The Smithsonian, through the Smithsonian Science Education Center, plays an active role in sparking students' and teachers' interest in STEM to ensure scientific literacy and a sustainable planet.
