Digitization and preparation of these materials for online access and the development of this subject guide has been funded by the National Science Foundation under BCS Grant No. 1561167 and the Recovering Voices initiative at the Smithsonian’s National Museum of Natural History.

INTRODUCTION

This guide highlights archival collections held at the National Anthropological Archives (NAA) and the Human Studies Film Archives (HSFA) related to the Ioway language and culture. This guide is intended to facilitate research on the highlighted documentation by enhancing the discoverability of materials and efficiency of searches. The materials represented in this subject guide and held at the NAA are not exhaustive, nor are they representative of all the Ioway documentation in existence. It is also important to understand that given the historical nature of this documentation—these materials were collected and catalogued throughout the nineteenth and twentieth centuries—its metadata reflects terminology in use at the time, which may be at odds with contemporary terminology. This terminology does not reflect the views of the Smithsonian Institution or National Anthropological Archives but is left in its original form to facilitate research. This guide is also a living document, subject to change and revision as staff updates catalog descriptions and access policies, and as further materials are processed and/or acquired by the NAA.
The NAA welcomes input and edits from Native community members, and works to incorporate these changes into catalog records, access policies, collection information, and subsequently, subject guides.

Additional information about each collection is available in the catalog record in Collections Search Center (CSC) or the Smithsonian’s Online Virtual Archive (SOVA). Further information for some collections can also be found in finding aids. Finding aids are more detailed than the annotations in this guide. They provide context for the materials described as well as a contents list, usually to the box and folder level, and sometimes to the item level. The existence of a finding aid will be noted (and linked) in the annotations within this guide. The National Museum of Natural History (NMNH) and the National Museum of the American Indian (NMAI) also have extensive object collections which can be searched in CSC. NMAI’s archival collections can likewise be searched both in CSC and in SOVA.

Some of the materials within the collections of the NAA and HSFA are restricted because either the NAA or the community to which the records relate have deemed the materials sensitive.

UNDERSTANDING THE EMBEDDED LINKS IN THIS GUIDE

Links through the title of a collection will usually lead you to a record in the Collections Search Center (CSC) for the full collection. In cases where a CSC record does not exist for the full collection, the link will lead you to a set search in CSC which displays the items within the collection that have been catalogued.

Links through the phrase “Finding Aid available through SOVA” will lead you to the finding aid in the Smithsonian Online Virtual Library (SOVA). The finding aid’s main page will contain all of the same information as the CSC catalog record, but if the collection is described in more detail, the lower levels of the collection can be navigated more easily through the SOVA record as their hierarchy is visible.

Links through the titles of articles or books will link you to a digital copy of the material.

Finally, links embedded in the name of other institutions will lead you to the websites of those institutions.

HISTORY OF THE NATIONAL ANTHROPOLOGICAL ARCHIVES

The NAA, along with the HSFA, collects and preserves historical and contemporary anthropological materials that document the world’s cultures and the history of anthropology. The materials housed within the NAA include the papers of Smithsonian Institution employees, materials donated by other scholars, and materials copied from other institutions. The NAA is
the successor to the archives of the Bureau of American Ethnology (BAE). The BAE was founded in 1879 as the Bureau of Ethnology (the name changed in 1894). It was created by the United States Congress as a subsidiary department of the Smithsonian Institution. The first director, John Wesley Powell (1834-1897), and his staff were concerned that the expansion of white culture into the west would lead to the destruction of Native American cultures and wanted to record them before they disappeared. Powell was primarily interested in recording the languages of Native American tribes and directed his staff accordingly. He created a “schedule” of languages, which today we would call a standardized form. This schedule was a list of words grouped by theme with blank spaces to enter translations. These schedules comprise a significant portion of the BAE’s early archival collections and were used in Powell’s *Introduction to the Study of Indian Languages*. In addition to linguistic records, Powell directed his staff to collect cultural objects and specimens, which was the primary interest of the secretary of the Smithsonian Institution. After Powell’s death in 1902, the activities of the BAE became less focused, and the staff members began to follow their own interests rather than a single overarching purpose. In 1964, the secretary of the Smithsonian Institution, Dillon S. Ripley (1913-2001), announced that the BAE would be combined with the Department of Anthropology of the National Museum of Natural History. In 1968, The NAA was established, incorporating the collections of the BAE as well as the papers of the National Museum of Natural History’s Division of Ethnology (Department of Anthropology). These collections include the Smithsonian’s earliest attempts to document North American Indigenous cultures and the cultures of the world. The archival collections of the BAE are known as the Numbered Manuscript Collections. Much of the NAA’s current holdings related to language documentation and ethnohistory were collected and created by Smithsonian anthropologists in the nineteenth and twentieth centuries.

**IOWAY ARCHIVAL MATERIAL**

The Ioway archival materials held at the NAA date from mid-nineteenth century to the early twenty-first century. These materials include vocabularies, grammatical notes, field notes, photographs, artwork, maps, and sound recordings. Much of this material was collected by Robert Rankin, a linguist at the University of Kansas from 1969 to 2005, who worked with the last native speakers of the Quapaw and Kaw (Kansa, Kanza) languages, as well as researching other tribes – including the Ioway – and fellow linguists. Some material represented in the following guide has been published. Where possible, this guide provides links to those publications.

Alternative names or spellings for Ioway include “Iowa,” “Iowa-Oto,” “Baxoje,” and “Chiwere.” The documentation in the records listed in this guide may be in the Iowa language, English, and/or other languages of the Siouan language originally spoken by the Missouria, Otoe, and Ioway peoples.
It is important here to note the distinction between a creator and a collector. The creator of an archival collection is generally the person who collected the materials, regardless of who created the materials themselves. Many NAA collections are named for their collectors, who may have created all of the materials included, collected all of the materials included, or (most likely) some combination of the two. Where possible, the collections included in this guide list the people who created the materials as creator and the people who collected the materials as collector, though you will find the collectors listed as creators when you follow the links. It is possible, however, that information has been missed in some cases and so may appear misleading.

**Manuscript 4800: James Owen Dorsey papers, circa 1870-1956 (bulk 1870-1895)**

Reverend James Owen Dorsey (1848-1895) was a missionary and Bureau of American Ethnology ethnologist who conducted extensive research on Siouan tribes and languages. The papers of James Owen Dorsey comprise mostly ethnographic and linguistic materials on various tribes of the Siouan language family as well as tribes from Siletz Reservation in Oregon. These materials include texts and letters with interlineal translations; grammar notes; dictionaries; drawings; and his manuscripts. In addition, the collection contains Dorsey's correspondence, newspaper clippings, his obituaries, and reprints.

This series contains Dorsey's linguistic and ethnological research on the tribes of the Siouan-Catawba language family, spanning from his days as a missionary among the Ponca to his research as a BAE ethnologist. Materials consist of field notes, census, reading notes, drafts of manuscripts for publication, and papers for presentations. The series also contains dictionaries that he compiled on Omaha, Ponca, Quapaw, and Biloxi, as well as his work editing Steven Riggs' Dakota-English Dictionary. As part of his research, Dorsey also gathered and analyzed the linguistic data collected by his colleagues. These notes and a small amount of correspondence with his colleagues are also in this series.

Many of these materials are digitized and are available to view online through the finding aid.

The James Henri Howard papers document his research and professional activities from 1949-1982 and primarily deal with his work as an anthropologist, archeologist, and ethnologist, studying Native American languages & cultures. The chief field materials represented in the collection are sound recordings and photographs, but many of the latter are yet to be identified. Other documents include copies of papers and other research materials of colleagues. PHOTOGRAPHS AND ARTWORK

The NAA has extensive photographic collections. Description and arrangement of photographic collections vary widely depending on the circumstances of creation, collection, and accession into the NAA. The records described below should be considered starting points for research; they should not be considered a comprehensive list.

Researchers looking for more specific images will probably be best served with keyword searches of the Smithsonian’s Collection Search Center (CSC) because a large number of photographs have been given item-level catalog records. We suggest using specific terms (e.g. “Ioway” + “basket”) and narrowing the results by using “National Anthropological Archives” as the catalog record source and “Photographs” as type.

Please note that any Photo Lot number preceded by the letter “R” represents a reproduction of a collection held at another repository.

The Robert Rankin Papers document his field work, research, and professional activities, primarily in relation to his work studying American Indian languages. Rankin was professor of linguistics at the University of Kansas from 1969 until his retirement in 2005. The collection consists of sound recordings, field notebooks, vocabulary lists and bibliographies, dictionaries, research files, slip files, word lists, correspondence, ephemera, notes, readings and reprints, writings, drafts, and teaching materials. This includes materials from Rankin’s work with the last native speakers of the Quapaw and Kaw (Kansa, Kanza) languages and subsequent research, writings, and collaborations with tribes and fellow linguists.
