ACKNOWLEDGEMENTS

The development of this subject guide was funded by the National Science Foundation’s Cultural Anthropology Division, Grant No. 162706. Much of the detail in this guide was made possible by the work of William L. Merrill, Marian Kaulaity Hansson, Candace S. Greene, and Frederick J. Reuss in their *Guide to the Kiowa Collections at the Smithsonian Institution* (1997).

INTRODUCTION

This guide highlights archival collections held at the National Anthropological Archives (NAA) and the Human Studies Film Archives (HSFA) related to the Kiowa. This guide is intended to facilitate research on the highlighted documentation by enhancing the discoverability of materials and efficiency of searches. The materials represented in this subject guide and held at the NAA are not exhaustive, nor are they representative of all the Kiowa documentation in existence. It is also important to understand that given the historical nature of this documentation—these materials were collected and catalogued throughout the nineteenth and twentieth centuries—its metadata reflects terminology in use at the time, which may be at odds with contemporary terminology. This terminology does not reflect the views of the Smithsonian Institution or National Anthropological Archives but is left in its original form to facilitate research. This guide is also a living document, subject to change and revision as staff updates catalog descriptions and access policies, and as further materials are processed and/or acquired by the NAA.

The NAA welcomes input and edits from Native community members, and works to incorporate these changes into catalog records, access policies, collection information, and subsequently, subject guides.

Additional information about each collection is available in the catalog record in Collections Search Center ([CSC](#)) or the Smithsonian’s Online Virtual Archive ([SOVA](#)). Further information for some collections can also be found in finding aids. Finding aids are more detailed than the annotations in this guide. They provide context for the materials described as well as a contents

list, usually to the box and folder level, and sometimes to the item level. The existence of a finding aid will be noted (and linked) in the annotations within this guide. The National Museum of Natural History ([NMNH](#)) and the National Museum of the American Indian ([NMAI](#)) also have extensive object collections which can be searched in [CSC](#). NMAI's archival collections can likewise be searched both in [CSC](#) and in [SOVA](#).

Some of the materials within the collections of the NAA and HSFA are restricted because either the NAA or the community to which the records relate have deemed the materials sensitive.

UNDERSTANDING THE EMBEDDED LINKS IN THIS GUIDE

Links through the title of a collection will usually lead you to a record in the Collections Search Center (CSC) for the full collection. In cases where a CSC record does not exist for the full collection, the link will lead you to a set search in CSC which displays the items within the collection that have been catalogued.

Links through the phrase "Finding Aid available through SOVA" will lead you to the finding aid in the Smithsonian Online Virtual Library (SOVA). The finding aid's main page will contain all of the same information as the CSC catalog record, but if the collection is described in more detail, the lower levels of the collection can be navigated more easily through the SOVA record as their hierarchy is visible.

Links through the titles of articles or books will link you to a digital copy of the material.

Finally, links embedded in the name of other institutions will lead you to the websites of those institutions.

HISTORY OF THE NATIONAL ANTHROPOLOGICAL ARCHIVES

The NAA, along with the HSFA, collects and preserves historical and contemporary anthropological materials that document the world's cultures and the history of anthropology. The materials housed within the NAA include the papers of Smithsonian Institution employees, materials donated by other scholars, and materials copied from other institutions. The NAA is the successor to the archives of the Bureau of American Ethnology (BAE). The BAE was founded in 1879 as the Bureau of Ethnology (the name changed in 1894). It was created by the United States Congress as a subsidiary department of the Smithsonian Institution. The first director, John Wesley Powell (1834-1897), and his staff were concerned that the expansion of white culture into the west would lead to the destruction of Native American culture and wanted to record it before it disappeared. Powell was primarily interested in recording the languages of Native American tribes and directed his staff accordingly. He created a "schedule" of languages, which today we would call a standardized form. This schedule was a list of words grouped by

theme with blank spaces to enter translations. These schedules comprise a significant portion of the BAE's early archival collections and were used in Powell's [*Introduction to the Study of Indian Languages*](#). In addition to linguistic records, Powell directed his staff to collect cultural objects and specimens, which was the primary interest of the secretary of the Smithsonian Institution. After Powell's death in 1902, the activities of the BAE became less focused, and the staff members began to follow their own interests rather than a single overarching purpose. In 1964, the secretary of the Smithsonian Institution, Dillon S. Ripley, announced that the BAE would be combined with the Department of Anthropology of the National Museum of Natural History. In 1968, The NAA was established, incorporating the collections of the BAE as well as the papers of the National Museum of Natural History's Division of Ethnology (Department of Anthropology). These collections include the Smithsonian's earliest attempts to document North American Indigenous cultures and the cultures of the world. The archival collections of the BAE are known as the Numbered Manuscript Collections. Much of the NAA's current holdings related to language documentation and ethnology were collected and created by Smithsonian anthropologists in the nineteenth and twentieth centuries.

KIOWA ARCHIVAL MATERIAL

The Kiowa archival materials housed within the National Anthropological Archives (NAA) roughly span the years 1880-1950. They are primarily comprised of ethnographic and linguistic notes, as well as correspondence, but also include unpublished manuscripts, published articles, newspaper clippings, copies of Congressional legislation, government reports (including censuses), photographs, and artwork.

The NAA holds hundreds of photographs showing Kiowa people, practices and objects. Many of these images were collected under the aegis of the BAE, some are part of the professional papers of anthropologists, and others are *artificial collections*¹ created at the archives. They represent diverse formats, including prints, glass negatives, glass lantern slides, film slides and film negatives. Many have been digitized and are available through the [Smithsonian online catalog \(CSC\)](#). See the "[Photographs](#)" section below for more information.

The most significant contributors to the NAA's Kiowa collections were James Mooney, Hugh L. Scott, John P. Harrington, and Weston La Barre. James Mooney (1861-1921) was a self-taught ethnographer with the Bureau of American Ethnology (BAE) from 1885 to 1921. Mooney conducted research among the Kiowa over the course of twenty-seven years of fieldwork (1891-

¹ An artificial collection is one which was created at the archive rather than transferred to the archives in its full form. The distinction is primarily important in this context because the materials within the collection have come from different sources and so have a wide variety of creators.

1918). His materials are primarily correspondence and notes, including his work on pictographic records and symbolism. His work among the Kiowa was cut short due to complaints by the government that he was promoting peyote use and was a supporter of the Peyote Religion. John P. Harrington (1884-1961) was an ethnologist with the BAE specializing in linguistics. Harrington collected the majority of his material from Kiowa who travelled to Washington, D.C., or from correspondence, rather than by travelling to Oklahoma. Raoul Weston La Barre (1911-1996) was an anthropologist and ethnologist who is best known for his work with ethnobotany, his work on Native American religion, and for applying psychiatric and psychoanalytic theories to ethnography. He conducted field work among the Kiowa in Oklahoma under the auspices of the Santa Fe Laboratory of Anthropology in 1935. He also did extensive research into peyote use and the Native American Church. Among his papers is an unpublished manuscript entitled "The Autobiography of a Kiowa Indian" based on the life of Charley Apekaum.

Garrick Mallery, Albert S. Gatschet, and Truman Michelson also contributed material. Garrick Mallery (1831-1894) was an ethnologist with the BAE who focused primarily on Native American sign language and pictography. In his work with the BAE, Mallery pioneered the study of sign language and pictographs, examining them as a universal human phenomenon with a direct link to spoken language. Albert Gatschet (1832-1907) was a linguist and one of the original staff members of the Bureau of Ethnology (later the BAE), where he remained until his retirement (1869-1905). Mallery and Gatschet collected Kiowa linguistic materials in the 1870s. Truman Michelson (1879-1938) was a linguist and anthropologist who worked at the BAE from 1910 until his death in 1938. Most of Michelson's research focused on languages in the Algonquian family.

Other significant materials in the NAA collection include over one thousand photographs of Kiowa subjects and drawings and paintings created by Kiowa artists in the nineteenth and twentieth centuries. The Kiowa artists who contributed the most significant quantity of material were Haungooah (Silver Horn), Etahdleuh Doanmoe, and the Kiowa Five (or Six). Haungooah (1860-1940) and Etahdleuh Doanmoe (1856-1888) were both Kiowa ledger artists. Doanmoe was one of the 26 Kiowa men imprisoned at Fort Marion in Augustine, Florida, for three years. The Kiowa Five (or Six) were composed of Spencer Asah (1905-1954), James Auchiah (1906-1974), Stephen Mopope (1898-1974), Jack Hokeah (1902-1969), Lois Smoky (1907-1981), and Monroe Tsatoke (1904-1937). They earned national and international acclaim during the early twentieth century. A number of the artists attended St. Patrick's Mission School in Anadarko, Oklahoma, where they received art instruction from Sister Olivia Taylor. Susan Peters, a government field matron, also took an interest in the young artists' work. She arranged for an artist from Chickasha to provide art lessons. Eventually Ms. Peters persuaded Dr. Oscar Jacobson, head of the school of art at the University of Oklahoma, to provide additional training for the artists. In 1926, Asah, Hokeah, Tsatoke, and Mopope arrived at the University. The artists were not officially enrolled, but they received special instruction. In January 1927, Lois Smoky, a young

Kiowa woman, arrived to study with the other artists. In spring, the artists were compelled to return home to attend to agricultural pursuits. They returned in the fall, accompanied by James Auchiah, the sixth and final student. Shortly thereafter, Lois Smoky withdrew from the program and returned home.

It is important here to note the distinction between a creator and a collector. The creator of an archival collection is generally the person who collected the materials, regardless of who created the materials themselves. Many collections are named for their collectors, who may have created all of the materials included, collected all of the materials included, or (most likely) some combination of the two. Where possible, the collections included in this guide list the people who created the materials as creator and the people who collected the materials as collector, though you will find the collectors listed as creators when you follow the links. It is possible, however, that information has been missed in some cases and so may appear misleading.

Previously cataloged as “Kiowa and others.” It was changed to the Cheyenne file after more complete identifications supplied by Karen D. Peterson and Father Powell showed that the majority of the drawings were Cheyenne.

Department of Anthropology records, 1840s-circa 2015

Created by the Department of Anthropology of the National Museum of Natural History. 330.25 linear feet (519 boxes). [Finding Aid available through SOVA.](#)

This collection records contains administrative and research materials produced by the department and its members from the time of the Smithsonian Institution's foundation until today. It includes correspondence, manuscripts, photographs, memoranda, invoices, meeting minutes, fiscal records, annual reports, grant applications, personnel records, receipts, and forms. The topics covered in the materials include collections, exhibits, staff, conservation, acquisitions, loans, storage and office space, administration, operations, research, budgets, security, office

procedures, and funding. The materials were created by members of the Section of Ethnology of the Smithsonian Institution, the Division of Anthropology of the United States National Museum, the Office of Anthropology of the National Museum of Natural History, and the Department of Anthropology of the National Museum of Natural History. The Department of Anthropology records also contain some materials related to the Bureau of American Ethnology (BAE), such as documents from the River Basin Surveys. Materials related the Kiowa can be found in the following locations:

- Series 7: Publication File / [MSS Pending: Bittle, W. E. - Kiowa Apache Ethnobotany](#)
- [Division of Ethnology Manuscript and Pamphlet File](#). 41 linear feet. The manuscript and pamphlet file is virtually a potpourri of documents, including correspondence, notes, drawings, maps, photographs, printed and processed materials, paper specimens, reports, writings, catalogs, motion picture film, bibliographies, and other types of documents. Of concern is a wide variety of subjects such as anthropological specimens, museology and museums, Smithsonian history, archaeological and ethnological methods, exhibits, expeditions, and the history of anthropology. The file seems to have been maintained by the Division of Ethnology and the subject matter is largely ethnological. Some documents, however, concern archaeology and physical anthropology. The file also contains some administrative materials—records relating to the Department of Anthropology’s use of Work Projects Administration workers, for example. In addition, it is the main location of materials not generally accepted as being strictly anthropological in the modern sense. The file also includes the papers of multiple staff members.

[John P. Harrington papers, 1907-1959](#)

Created by John Peabody Harrington. 683 linear feet. [Finding Aid available through SOVA](#). Digital surrogates available.

Harrington was a Bureau of American Ethnology (BAE) ethnologist involved in the study of over one hundred American tribes; his specialty was linguistics. Most of the material concerns California, southwestern, and northwestern tribes and includes ethnological, archaeological, and historical notes; writings; correspondence; photographs; sound recordings; biological specimens; and other types of documents. Also of concern are general linguistics, sign language, writing systems, writing machines, and sound recording machines. The collection incorporates material of Richard Lynch Garner, Matilda Coxe Stevenson, and others. In his field work, Harrington seems sometimes to have worked within fairly firm formats, this especially being true when he was “rehearing” material, that is in using an informant to verify and correct the work of other researchers. Often, however, the interviews with informants (and this seems to have been the case even with some “rehearings”) seem to have been rather free form, for there is a considerable intertwining of subjects. Nevertheless, certain themes frequently appear in his work, including annotated vocabularies concerning flora and fauna and their use, topography, history and

biography, kinship, cosmology (including tribal astronomy), religion and philosophy, names and observations concerning neighboring tribes, sex and age division, material culture, legends, and songs. The fullness of such materials seems to have been limited only by the time Harrington had to spend with a group and the knowledge of his informants. Materials related to the Kiowa can be found in the following locations:

- Series 5: Papers relating to the Native American History, Language and Culture of the Plains, 1916-1951, undated / [Subseries 5.1: Kiowa, 1916-1948](#)
- Series 5: Papers relating to the Native American History, Language and Culture of the Plains, 1916-1951, undated / Subseries 5.3: Siouan, 1919-circa 1945 (bulk 1937-1939) / [Comparative Linguistic Notes](#)
- [Series 9: Correspondence, 1904-1960, undated \(bulk 1935-1954\).](#)

[Raoul Weston La Barre papers, 1934-1970](#)

Created by Raoul Weston La Barre. 7 linear feet. [Finding Aid available through SOVA.](#)

This collection reflects part of the work and study of Raoul Weston La Barre, anthropologist and ethnologist. Included are field notes, research noteslips, correspondence, bound and unbound manuscripts, a scrapbook, materials on ethnobotany, photographs, special subject files, and miscellany consisting of publications, processed material, and clippings. The Kiowa Studies and Peyote Studies relate to La Barre's field trips to Oklahoma in 1935 and 1936 and his study of Peyotism and the ethnography of the Kiowa Indians. Considerable material relates to the Native American Church. The field notes are the result of interviews with informants among the Kiowa and have never been published. There is also some material on Kiowa linguistics. Related photographs include portraits of Native Americans, many of whom were active in the Native American Church and Peyotism. Other Peyote Studies materials represent La Barre's interest in peyote and drug use during the 1960s. Much of this material relates to the Kiowa-Peyote Materials but with less emphasis on the Kiowa and more emphasis on hallucinogenic drugs. Some attention is paid to legal aspects of religious use of peyote. The correspondence throughout the collection deals mainly with the editing and publication of La Barre's various manuscripts. Very little correspondence is of a professional nature.

[James Mooney papers, 1859-1980](#)

Created by James Mooney. 1.25 linear feet. A finding aid is available at the repository, or on request through email.

James Mooney's knowledge of Native Americans was self-taught. He read widely and began a compilation of tribal names. After working as a teacher and newspaperman, he sought employment with John Wesley Powell, Director of the Smithsonian Institution's Bureau of

American Ethnology (BAE), who engaged him in 1885. At the BAE Mooney developed such a breadth and depth of knowledge that he came to be recognized as one of the most outstanding authorities on Native Americans. Mooney advocated meticulous field study and sought long association with his subjects. One of his areas of chief concern was the Kiowa tribe. Mooney's investigations led him to several cross-cultural studies, including most notably an investigation of the Ghost Dance Religion and the use of peyote. He also wrote many articles for Frederick W. Hodge's *Handbook of American Indians North of Mexico* (BAE Bulletin 30, 1907 and 1910) and prepared several exhibits for international expositions. Materials related to the Kiowa can be found in the following locations:

- Series 1: Letters, 1859-1919
- Series 2: Articles and Talks
- Series 6: Printed Material Concerning Mooney, undated

[Amy Zaharlick, George L. Trager, and Felicia H. Trager sound recordings and papers on Picuris language, 1952-1990](#)

Created by Ann Marie Zaharlick, Felicia Harben Trager, and George L. Trager. 4 linear feet; 130 sound recordings. [Finding Aid available through SOVA](#).

This collection contains sound recordings and notes relating to the Picuris language research of Ann Marie (Amy) Zaharlick and her colleagues George L. and Felicia H. Trager, from 1962 to 1990. Most of the papers consist of Zaharlick's notes and transcripts from the Kiowa-Tanoan conferences which she organized and chaired, and handouts relating to Zaharlick's bilingual education consultant work. Small portions of the Tragers' field notes on Taos, which were copied by Zaharlick, presumably for her own research, are also included. The bulk of the collection consists of 130 sound recordings of songs and stories in Picuris and other Puebloan languages made between 1963 and 1989. There are few earlier recordings which may be copies of material in Trager's papers at the University of California, Irvine.

PHOTOGRAPHS AND ARTWORK

The NAA has extensive photographic collections. Description and arrangement of photographic collections vary widely depending on the circumstances of creation, collection, and accession into the NAA. The records described below should be considered starting points for research; they should not be considered a comprehensive list.

Researchers looking for more specific images will probably be best served with keyword searches of the Smithsonian's Collection Search Center ([CSC](#)) because a large number of photographs have been given item-level catalog records. We suggest using specific terms (e. g. "Kiowa" +

“basket”) and narrowing the results by using “National Anthropological Archives” as the catalog record source and “Photographs” as type.

Please note that any Photo Lot number preceded by the letter “R” represents a reproduction of a collection held at another repository.

Manuscript 39c: Kiowa drawings by Koba, Etahdleuh, and others, 1875-1878

Created by Etahdleuh Doanmoe and Kobe. 33 graphite, colored pencil, crayon, ink, and watercolor drawings (12cm x 18cm - 20cm x 55cm). [Finding Aid available through SOVA](#). Some digital surrogates available.

The manuscript contains 28 drawings depicting warfare, courting, hunting, dances, a horse race, and an intertribal meeting. The drawings also include 5 pages with pictographs representing various words and the names of the prisoners. Included in the manuscript are rosters of the Ft. Marion prisoners listing the prisoners’ names and tribal affiliations. Several drawings are inscribed with the name of Koba, some with the name Etahdleuh. Most were probably drawn by Kobe (Wild Horse). During the Red River War Kobe (1848-1880) was a member of the Kiowa band that surrendered on February 18, 1875. Following his surrender, he was confined at Fort Sill, Indian Territory. He was accused of stealing horses and mules in Texas and participating in the August 22, 1874, skirmish at the Wichita Agency, one of the opening engagements of the Red River War. He was among the Kiowa prisoners who were incarcerated in Fort Marion in St. Augustine, Florida, following the end of the conflict. After his release from Ft. Marion, Koba attended the Hampton Institute in Virginia and the Carlisle Institute in Pennsylvania, where he studied to be a tinsmith. Etahdleuh (1856-1888) was also known as Etahdleuh, Etadeleuh, Etahdleuh Doanmoe, Boy, and Boy Hunting. He was imprisoned at Fort Marion in St. Augustine, Florida from 1875 to 1878. After his release from Fort Marion, he attended the Hampton Normal and Agricultural Institute in Virginia. In 1879, he travelled to the Indian Territory to recruit pupils to attend the Carlisle Institute in Pennsylvania, where he would study and work on and off from 1879 to 1887. He made two extended trips back to the reservation during this period and from February to May 1880, he worked at the Smithsonian Institution in Washington, DC. He was trained as a Presbyterian missionary and returned to the reservation in January 1888 to serve in this capacity.

Twenty drawings in a commercial exercise book that has been rebound. The drawings depict hunting, courtship, dance, social gatherings, Native American scouts, mounted and dismounted warriors, and part of the Kiowa Sun Dance. The inside of the front cover is inscribed, "Capt Pratt USA", "By the Indians", "By the Indians incarcerated in Fort Marion St. Augustine in 1876", "Engaged in the Custer Massacre", "Care of Capt Pratt in charge assisted by the following ladies Mrs Linethurst, Mrs Gibbs - Mrs S' Mother St Augustine Mrs Kingsly Gibbs aunt Mrs Valentine Phila Miss Reed", "Carlisle was the outcome of Capt Pratt's efforts assisted by Mrs Kingsly Gibbs of St Augustine". The back cover is inscribed "Works of the Indians while in prison in Fort

Marion St Augustine Florida/ after the Custer Massacre in care of Capt Pratt/ The founder of Carlisle/ These Indians finally taken there for housing and taming/ by the Government/ under the care of Capt Pratt USA”. In addition to the inscription, the back cover bears the image of a man wearing a breechcloth, which was scratched into its surface. The name “ZOTOM” appears in stencil block letters on the back cover and the inside of the front cover. Although Zotom was a noted Kiowa artist, it is not clear that he is responsible for the drawings. Candace Greene notes that they are unlike his later work and early documented examples of his drawing style have not been identified.

Manuscript 2002-27: Quitone Kiowa calendar, 1825-1921

The creator of these drawings is unknown. 171 drawings (25 leaves, graphite, watercolor, and ink on card stock, 28cm x 22cm). [Finding Aid available through SOVA](#). Digital surrogates available.

The calendar consists of 171 pictographs on heavy card stock. Each page contains two to four pictographs, arranged top to bottom and left to right. The calendar entries cover the period 1825-1921. A red diamond is used to signify winter and a green or yellow bar to signify summer. A depiction of the forked Medicine Lodge pole often accompanies the symbol for summer. No information is known about the original production of this calendar. However, the pictures are a close match to a tracing that Wilbur S. Nye made in the 1920s of a calendar on cloth belonging to Jimmy Quitone, although arranged in a different format, and this may be considered a variant of the Quitone calendar. Nye’s tracing is in the collection of the Fort Sill Museum in Oklahoma together with his notes about the version that he examined. He recorded that while Quitone owned the calendar when he made the tracing, it had been produced by Johnny Anko and Hauvahte. Hauvahte may be an alternate rendering of Habate, or Haba. Nye believed that the calendar was destroyed when the Quitone home burned in the 1930s.

Manuscript 2002-28: Kiowa calendar on canvas, 1862-1901

The creator of these drawings is unknown. 1 pictorial calendar (77 drawings, graphite and colored pencil, 10cm x 213cm). [Finding Aid available through SOVA](#). Digital surrogates available.

The calendar consists of 77 entries drawn on a piece of coarse cotton cloth with one selvedge edge and one edge machine hemmed. The entries begin near one end of the strip and move from left to right in a staggered linear sequence, stopping well short of the opposite end. Summer and winter entries alternate, with the register of summer entries drawn above the register of winter entries. A green forked pole accompanies pictures for summers when the Medicine Lodge ceremony was held. A yellow diamond outlined in blue indicates winter seasons. The calendar covers the period between 1862 and 1901. No information is known about the original production of this calendar.

Book of 14 drawings on 8 leaves of unruled paper in a commercial drawing book. The book was rebound by the Bureau of American Ethnology (BAE) and the original covers are no longer visible. Drawings depict hunting, travelling, and camp scenes. The inside front cover is inscribed "Drawn by Buffalo Meat". The inside back cover is inscribed "Soaring Eagle [sic]". Buffalo Meat and Soaring Eagle were among the Cheyenne men imprisoned at Fort Marion. Although both men were artists, the drawings in this book are Kiowa, not Cheyenne, based on examination of

content. Although the drawings were originally cataloged as Cheyenne by Buffalo Meat, neither Candace Greene nor Karen Daniels Petersen agree with this attribution. They note that the drawings can be identified as Kiowa based on elements of clothing, as well as shield and tipi designs. Furthermore, Greene compared the drawings with other works by Buffalo Meat and determined that they do not correspond with the artist's style. Both Greene and Petersen note that the drawings are the work of at least two artists. Petersen notes that the handwriting matches an inscription written inside the cover of [Manuscript 39b](#), a drawing book that is known to have been collected at Fort Marion by George Fox, who inscribed the cover and captioned the drawings. George Fox worked as an interpreter at Fort Marion until March 26, 1877. Consequently, the book dates between May 21, 1875, the date the prisoners arrived at Fort Marion, and March 26, 1877, the date George Fox departed.

Photo Lot 64: Rodman Wanamaker photograph collection relating to Native Americans, 1908-1909

Created by Joseph K. Dixon and Rodman Wanamaker. 154 silver gelatin prints. [Finding Aid available through SOVA](#).

Rodman Wanamaker (1863-1928) was heir to a successful Philadelphia department business and a patron of the arts, education, and Native American culture. In the early 20th century, he hired photographer Joseph Kossuth Dixon and sponsored three expeditions to Native American reservations (1908-1913). The main goal of these expeditions was to document the way of life of Native Americans, whom he saw as a “vanishing race,” and to make “first-class citizens” of them as a means of saving them from extinction. In addition to still photography, films were also made during these expeditions including a motion picture film about Hiawatha made on the first expedition (1908), and a reenactment of the Battle of the Little Big Horn made on the second expedition (1909). The third expedition, the “Expedition of Citizenship” (1913), focused on carrying an American flag to tribes across the country and inviting them to sign a declaration of allegiance to the United States. The photographs largely depict northern Plains tribes, including Blackfeet, Cheyenne, Crow, and Dakota. These large bromide prints form a set of presentation photographs and apparently such sets were placed by Rodman Wanamaker in several museums. This collection includes 1 studio portrait of Running Bird.

Montezuma graduated from the University of Illinois (1884) and received his MD from the Chicago Medical College (1889). He developed a friendship with Richard Henry Pratt, head of the Carlisle Indian School, and took a post as reservation physician for the Bureau of Indian Services. During this time he developed an opposition to Bureau of Indian Affairs (BIA) policies and became a Native American advocate, speaking out against reservations. He gave numerous lectures on Native American rights at institutions around the United States, helped organize the Society of American Indians, and published a personal newsletter entitled Wassaja (1916-1922). The collection includes hand-colored glass lantern slides collected by Dr. Carlos Montezuma and used for his lectures on Native American rights. The materials were created by members of the Section of Ethnology of the Smithsonian Institution, the Division of Anthropology of the United States National Museum, the Office of Anthropology of the National Museum of Natural History, and the Department of Anthropology of the National Museum of Natural History. The Department of Anthropology records also contain some materials related to the Bureau of American Ethnology (BAE), such as documents from the River Basin Surveys. Researchers interested in artwork by Kiowas may find the following records of interest:

- [Division of Ethnology Manuscript and Pamphlet File](#). 41 linear feet. The manuscript and pamphlet file is virtually a potpourri of documents, including correspondence, notes, drawings, maps, photographs, printed and processed materials, paper specimens, reports, writings, catalogs, motion picture film, bibliographies, and other types of documents. Of concern is a wide variety of subjects such as anthropological specimens, museology and museums, Smithsonian history, archaeological and ethnological methods, exhibits, expeditions, and the history of anthropology. The file seems to have been maintained by the Division of Ethnology and the subject matter is largely ethnological. Some documents, however, concern archaeology and physical anthropology. The file also contains some administrative materials—records relating to the Department of Anthropology's use of Work Projects Administration workers, for example. In addition, it is the main location of materials not generally accepted as being strictly anthropological in the modern sense. The file also includes the papers of multiple staff members.

[Albert Samuel Gatschet papers, 1828-1906](#)

Created by Albert Samuel Gatschet. 11 linear feet.

Most of Gatschet's scientific papers are among the collection of numbered manuscript in the National Anthropological Archives (NAA). This collection is composed mainly of corrected proofs of his dictionary and texts. In addition there are several certificates and other such formal documents from Bern, visiting cards, and two letters. Most of these documents seem to pertain to members of Gatschet's family in Switzerland. A small photographic collection includes a portrait of Gatschet dated 1906. Most of the other images are of Apache, Arapaho, Cheyenne, Dakota, Kiowa, and Navaho Indians by J.N. Choate and C.C. Stotz. There are also prints from negatives in [Photo Lot 176](#) that include Mandan, Miami, Osage, and Shoshoni. Some of the photographs are annotated by Gatschet and James Mooney. The collection includes 3 photographs identified as Kiowa.

[John P. Harrington papers, 1907-1959](#)

Created by John Peabody Harrington. 683 linear feet. [Finding Aid available through SOVA](#).

Harrington was a Bureau of American Ethnology (BAE) ethnologist involved in the study of over one hundred American tribes; his specialty was linguistics. Most of the material concerns California, southwestern, and northwestern tribes and includes ethnological, archaeological, and historical notes; writings; correspondence; photographs; sound recordings; biological specimens; and other types of documents. Also of concern are general linguistics, sign language, writing systems, writing machines, and sound recording machines. The collection incorporates material of Richard Lynch Garner, Matilda Coxe Stevenson, and others. In his field work, Harrington seems sometimes to have worked within fairly firm formats, this especially being true when he was "rehearing" material, that is in using an informant to verify and correct the work of other researchers. Often, however, the interviews with informants (and this seems to have been the case even with some "rehearings") seem to have been rather free form, for there is a considerable intertwining of subjects. Nevertheless, certain themes frequently appear in his work, including annotated vocabularies concerning flora and fauna and their use, topography, history and biography, kinship, cosmology (including tribal astronomy), religion and philosophy, names and observations concerning neighboring tribes, sex and age division, material culture, legends, and songs. The fullness of such materials seems to have been limited only by the time Harrington had to spend with a group and the knowledge of his informants. The collection includes 72 photographs identified as Kiowa.

The creator of these drawings is unknown. 20 sheets. Digital surrogates available.

Assembled from various sources (such as Schoolcraft, Pacific Railroad Reports, etc.). Approximately 50 drawings, plus some printed and handwritten articles, mounted and unmounted.

[Raoul Weston La Barre papers, 1934-1970](#)

Created by Raoul Weston La Barre. 7 linear feet. [Finding Aid available through SOVA](#).

This collection reflects part of the work and study of Raoul Weston La Barre, anthropologist and ethnologist. Included are field notes, research noteslips, correspondence, bound and unbound manuscripts, a scrapbook, materials on ethnobotany, photographs, special subject files, and miscellany consisting of publications, processed material, and clippings. The Kiowa Studies and Peyote Studies relate to La Barre’s field trips to Oklahoma in 1935 and 1936 and his study of Peyotism and the ethnography of the Kiowa Indians. Considerable material relates to the Native American Church. The field notes are the result of interviews with informants among the Kiowa and have never been published. There is also some material on Kiowa linguistics. Related photographs include portraits of Native Americans, many of whom were active in the Native American Church and Peyotism. Other Peyote Studies materials represent La Barre’s interest in peyote and drug use during the 1960s. Much of this material relates to the Kiowa-Peyote Materials but with less emphasis on the Kiowa and more emphasis on hallucinogenic drugs. Some attention is paid to legal aspects of religious use of peyote. The correspondence throughout the collection deals mainly with the editing and publication of La Barre’s various manuscripts. Very little correspondence is of a professional nature. This collection includes 71 photographs identified as Kiowa.

Rankin's close collaboration with colleagues and tribes is well documented, especially his work with linguists John E. Koontz and W.L. Ballard, as well as his contributions to language documentation efforts including the *Handbook of North American Indians*, the *Annotated Dictionary of Kaw (Kanza)*, and the *Comparative Siouan Dictionary*. INDEX TO NAMES

This index is derived from *A Guide to the Kiowa Collections at the Smithsonian Institution*. See this guide for item level information. Unlinked or incorrectly linked entries were removed. In the cases where single individuals were known by multiple names or names had multiple spellings, Marian Kaulaity Hansson selected a preferred version and all other forms refer back to the preferred version. English translations for Kiowa names are provided in parentheses and are listed individually with a reference back to the Kiowa form. Anglo or partially Anglo names are listed with the surname first. The list is intended to facilitate access to the collections, and every effort has been made to ensure the list is both accurate and complete, but there may be some errors.

Collections marked with an asterisk (Vertical Files* and File Prints*) are not included in this guide because they are reference files, not archival collections. They can only be viewed on site.
