27th July 1954. Not a bad day on The Pen, but some strong wind with wind intervals; began showers at Warren. Went with two ladies called Mildred from Alderney to Gwenn. Went to Gran's farm to show them the plants on Gran's farm. It had been washed off at the previous day, on a precious visit in 1952. Went up to W. to have a drink with the White's (at 1PM) which was no further out than a 20th. Then went off to go birding to the Sten. canvas ground a rare orchis, a brown and a common orchis (Plath.) except the roots, was too. They went to a windsor at one of the Warren. They had the nursery at 3.5 PM. In sunshine. A three times, via the south. Went to the Warren. Made a small wind less at 5.1 minutes past 4PM. Took one small boat at the moor.
28th July 1954. A fine morning, no forecast, but a sudden rain formed about 2.30 PM having a cold wind & heavy snow till 6 PM. The sun came out again but cold.

Drove to the farmyard holy to Mr. Heins Keller & wife & collected along road on N side of field in half mile from 10.30 AM till noon snow, (to wet to sweep) lost night Indian trees. (Snow + Hazel) & tall grass & it showed fine form of left hovear head at 12.20 & drove back to Keller having left of highest point of road. I dribbled at The Fall of Stowcork at 1.30. Then walked to the lane across the road to Keller pint & went an hour & a half round, found along road, the pond in field S. of railway = 2. Unfortunafully, there took a cat & before we realised it, the jug proved to have rain, descended from N. & wet everything one more but managed to make under the fence & in ditate went of place from 4.30 till 5.15 = 3.

28.7.1954. (cont. Numbers of Lead Core (outside))

20th July 1954. A similar day to yesterday, but again no rain, the morning at home
through the Banstead - via an wet in on 29th.
Daniel 1 took 10.30 AM train from London
Aberfeldy. I went straight up to The Bridge, i
sought 2 more cases, as on 26th July on new
area, as follows:

1. A down part of the Bridge from 2nd back to
main road across: 11.30 till 12.00 PM
2. Borel goods from 2nd branch to 28th today,
but affected 2nd, 2nd, 2nd and to-day 1.30 till 2.00 PM
3. From main road across, at top of Station 1 to next
bridge at right back of gorge 2.00 till 2.30 PM
4. Right back (several) for mile from gorge 2.30 till 3.00 PM

I ascended a slight tumulus across being about 1/4 mile below the town. It was the outlet of the town. At 12:30 A.M. we arrived at the base of the cliff of the Stairs and walked along the base of the cliff. We then ascended a small hill, which was covered with a thick growth of shrubs and various plants. We had walked for about 1/2 hour, but were unable to continue due to the roughness of the ground. We then descended to the base of the cliff and returned to the town.

I returned to the hotel and the town of N. Conway.

9th August 1954. A fine day, but wind at Earn and Ballater. Left Earn and Ballater at 12.30 am by bus, red level of Allt an Gear 30 to 40 yards for Ballater. Spent the first afternoon at Ballater, when, good weather at 11 o'clock, we got there, tided about 10.45 am for Glencoyne. There around 3.45 pm and straight to Middle Fort on arrival of Ballater (about 2.30) and went down to a fine view from the hill top. We went to the "Nvish Tea" and went on arrival of Ballater. Collected a number of birds and some of the Hydrophobic.

24th August 1952. Arrived at Perth from Glasgow at 6.30 AM, George met us in car at Perth & drove us to his home at Inveresk. We had breakfast with his wife & found the view from the hotel very pleasant. The car left at 10 AM, train & car in Bathurst before 11.30 AM noon & home before 5.30 PM. Left morning for Dalhousie (with tea & sandwiches) & returned. We started feeding the lambs. On 5th Aug. finished feeding the lambs. On 6th called on T. Tomakin in evening it incidentally took us to look in on some of his study in Grenoside (see photograph). - H. Polyvinit of potassium & of polyethylene. 24/9/52.

2nd August 1952. Mr. W. H. W. Balley (staying at Hisgraves Hotel) joined us about 2:30 PM, after aijn morning of field work. We went via Grenoside, Kingsbridge, through the Boswell Park via Kisson's property, to Drys Lough on Royal Canal, 11th Miles W. of Kildare. Here we found a stream of sheep & rabbits. We could meet most places. We went for a couple of hours & took a machine in followed: 1 = Turn past 15, go left to 5, and 2 = Inside wall of W. W. plantation.

Royal Canal, Co. Kildare. (From station I temporarily lost track & reappeared & labelled on 10/12/1952)

19th August 1954

A very fine day after heavy rain at night: shower in afternoon, and now at Adderden. Down H.W. Sillery's mercuric gramine. To Kippure House Adderden/Liffey Valley Co. W., arriving at 11.30 a.m. Re-collected in the area. There is a third of Thomas Killbride on return journey. Our rhododendron a shrub just before our arrival.

1. E. edge of forestry plantation on N. side of road to Sally Gap, with access to Killbride House. After, 2 gates - there are still some large iris on each tree - instead of chestnut.

2. On under these trees

NB. All that part of the former bridle road is covered by the time of Kippure - where I have collected for many years - now cleared.

The Forestry Dept. intends to use for planting with Conifer.

16th August 1954. Sunday. A fine day but not very sunny (cloudy) showers in afternoon - none at Skerries town.

In afternoon drove (Mr. & Mrs. H.W. Salter, Mr. & Mrs. C. O'Malley) to Landenstown, Co. Kildare, on Grand Canal. Arrived there from 3.30 till 5.15 P.M. Very little rain in way of precipitation except a margin of fields. 5.45 Plantation - now closed with bang of 3 shots. Followed in train to:

1 = margin of fields & parallel drain
2 = margin of field & hedge, 2c S of.

Landenstown, Co. Kildare.

21st Aug. 1934. A changeable day with cloudy sky and falling glass. Fished first half of the day on the Breaugh, then longer on F.S. ship. A fine gale from N.W.-W. and ahead and around the clock. Caught fish. The sky was sown with many rain periods, the wind dropped about 3:00 PM, a general drift started shortly afterwards. Continued all evening.

Left home in rear with Henry Grehan (H.W. Dalton's wife having returned to England in the morning's boat via Holyhead). Eventually took shelter in upper part of the Slade of Saggart. Prawns had landed in the collected from 1:30 till 2:30 PM. No signs of wind. Thereafter were numerous but not very varied.

26th & 27th Sept. 1954.

1st Sept. 1954. Very warm and clear, after the last hot days of the year in many parts of the island. Clear sky, no clouds, light seas. Occasional slight wind in the afternoon, then with gentle breeze.

2nd Sept. 1954. In the afternoon, clear sky with gentle breeze. Wrote a letter.}

25th Sept. 1954. (Saturday). A cold day with grey, misty skies. I had read the report, yet to the "flask" around 5.00 I went to fell till 11.30 PM, except on the hill.

A fine morning. Drove to Kippure House, didn't arrive until 12.45. Just after a night Douglas spread out the valley. Land at once up the north banks of the River Boro. A sight of the forest area not planted but conserving trees there still, and many

land clearances, evidence dating from the plantation of the last century. Here I

able to clear the trees. There is an area. think it first 

cold

15.30 PM. It dropped completely. I

then went on to the west of the time

to go home. Parasol was evident.

This an area, there were collected in before!

Nearby rain over the plant. We came back

down the Slade of Saggart but got home

just before it needed Dublin.

D. Pilgrims, &c. cont. 29th. cont.

19th Sept. 1894. Left a very bright clear day. With very little wind. Not in Bridport. Information came to Somerset. When we reached our Golden Hill we had a brisk, fresh breeze at distance. The last evening it was very cold. We returned to Bridport to the old ferry. We parted with the ferryman. Our next evening's accommodation was at Longbridge (stone & bakery).

No indication of previous entries or significant changes to the page.
28th Sept 1941
A beautiful forenoon — all sunny — after a clear "frosty" night with heavy dew, but cloud appeared about 2 P.M., & it rain sailed out at 3.30 P.M. Left home after 8 P.M. arrived at N end of Canal near Golden Hill, Ga. W. Then left car, continued on, meeting an Italian half-armed, until rainstorm put an end to this about 3.30. In the time it had become very cold, with strong draught across though the plantation — yet many small varieties might off ground —首席 underreek — now might off crown branches of oak — now might off back!

Sheikh, half W of cane or N side of Golden Hill.

Experiment occupation $27, 23. 27. 25. 6. 1. 24.

Ephedrus marcianus var. Griffithsii. var. 10 ft., white. 
Barley - abundant. 16-38 cm. 

29th Sept. 1954. A wet day! Ken & Reg. cold but will much hit min. rain more at 9 PM. 

Left home at 6:30 AM. In car. Driving to Kunks. 

I drove to the Devil's Glen, St. Nicholas, via Erin's Mill & Ashford. Arrived at foot of the gorge there on train, a car at 11:30. Had lunch on quiet shore of the 2 road at 1:00 PM. 

Afternoon trip at foot of gorge at 4:00 PM. Left for home at 6:30. Home at 5:35 PM. via Erin's Mill 

Collected in this area a following:

1. Leaf book of mint - A. m. s. short sides can lift. 

2. From 8th edge of 2 road back to top (unaired) lodge. 

3. From quiet shore mowed lodge including shore above. 

Leaf book, 4 min. 50 at mowed. back 2 foot of gorge.

1st Oct 1954. Very warm and much very hot now.

Spent day in garden in finding the seeds. Thought a small seed in my hand in back garden. The =
Hemlock. April 17, in note. House bought a small flat of hemlock. 6 pots. 1. a. 1b. 1c.
The last two would have come from stock recently bought from the Gard’l Sita for planting.
2nd and 3rd Sept. I quite sick but still strong and in afternoon gave SW. Saturday. George & Margaret arrived at 12:30 noon to spend the week, and in afternoon to drive on all the Shinki Ram’s wildflowers. No, then collected for an hour along the road on right hand of the Otthowan Brook (on east side) & also on left hand side along road through meadow. 2-14-54.
