OF

Hymenoptera, other insects, plants, &c.,

seen or taken by A.W. Stelfox

from 9th June 1959

until 18th June 1960.
Western trip with H.W. & Mrs. Kelly
June 1929

Tuesday 9th June 5th
Leaves Geraldton at 10.30 a.m.
Arrived Broadwater, E. Donggal, about 10 a.m.
A very rainy (SW) giving us only 2 hours collecting possible in the journey. Had lunch by S more of road.
Evening at W. J. and Ernest. Birthday, 20th. Dinner, about 7-30 P.M. Dinner: Kew, sheeps and cheese, lemonade, potatoes, vegetables, cake. W.J. and Ernest give us a very good tour of various exhibits. Dined at 7:30 P.M.
A lot of afternoon interest round East Beach. At 8 p.m. we went to East Beach. At 8 p.m. we went to East Beach.

Wednesday 10th June
After heavy showers during night a long day. Nice sunny afternoon. Tire slightly dry.
Drove to Tuncurry Point about 7 a.m. Stayed with Mr. Kelly and collected by morning in four

Miscellaneous:
1. Along road from town to Tuncurry. Weather: 11.00 a.m. 11.30 a.m.
2. By the shore (Kew road?) Mile 8 of shelter. 11.45-12.00 P.M.
3. At caravan, started with 4 duros (with hotel) sat
        Barmah 2:30 3:00 P.M.
4. At caravan, backs of dead. At 4:30 5:00 P.M.
10.6.89, ind. Sandhill cranes
Teal drake 3.

Swifly = S. bernicea bernicape 2.
12th June 1929. After a very wet night, a very windy, wintry day with no drying till late afternoon. Leto spent the morning of a lying in bed. Mr. Balling drove the party via Sligo to Donegal Road on a shore of Lough Gill, where he was planted (I think) in front of the forest. Here I collected a few birds on the shore and I should go to the wet vegetation. Leto then drove around the head of the shore and Drumcullen was looked upon afternoons. At Strabur Wood, I collected several specimens of the leaves, where a small brown ant was Met a day an almost不可读 at the period (a 2)

Shore of Lough Gill, Sligo.

Tide in 1 1/2, Donegal Road: 12:30 - 20:14.

Timed at 288 cm, in 30 min.

Barren, fallow, and woods. Reverse of 2, 1 internal and 1 external.

Barnes (8) longitudinal, minute size of crested, stalk of 0.35, 0.5 at 0.35, effusive, 299 St. Eleanor company, 3 1/2, 1 1/2, 0.5, 3/4, 1/2, 1/4, 0.35, 0.25, 0.15, 0.1, 0.05, 0.025, 0.0125, 0.00625.

June 5th. A very fine day. Not all rain out. Went NW.
Dinner to B. M. Letter to B. M. Harley. Then walked to
finally Strand, all Co. Sligo. I collected in 3 areas.

2. South of, in a small wood, near house, 12.10 till 2.15.
3. Strand of E end, then went back to, at Strand, 3.30 till 4.00.

(a1) Strand on both sides of road near outlet of
Benniduff Lough Co. Sligo.

- Bogland, 7 : 30 a.m., 11.00, afternoon, 4.00 a.m.
- Collared Lizard, Corispe, 2:30 a.m.
- Bessy, 2:30 a.m.
- Stock, N. E. 2:30 a.m., very nice specimen.

- Great Horned Owl, 3:30 a.m.
- Nightjar, 4:00 a.m.
- Plover, 4:30 a.m., not old.
- Ruffed Grouse, 5:00 a.m., not old.
- Barn Owl, 5:45 a.m., not old.
- Phoebe, 6:15 a.m., not old.
- Yellow-rumped Warbler, 7:00 a.m., not old.
- Black-capped Chickadee, 7:30 a.m., not old.
- Dusky Thrush, 8:00 a.m., not old.
- Red-eyed Vireo, 8:30 a.m., not old.

- Great Horned Owl, 11:00 a.m., not old.
- Barn Owl, 12:00 a.m., not old.
- Collared Lizard, Corispe, 1:00 a.m., not old.
- Bessy, 1:30 a.m., not old.
- Stock, N. E. 2:00 a.m., not old.
- Plover, 3:00 a.m., not old.
- Ruffed Grouse, 4:00 a.m., not old.
- Nightjar, 4:30 a.m., not old.
- Collared Lizard, Corispe, 5:00 a.m., not old.
- Barn Owl, 5:30 a.m., not old.
- Collared Lizard, Corispe, 6:00 a.m., not old.
- Bessy, 6:30 a.m., not old.
- Plover, 7:00 a.m., not old.
- Stock, N. E. 7:30 a.m., not old.
- Ruffed Grouse, 8:00 a.m., not old.
- Nightjar, 8:30 a.m., not old.
- Barn Owl, 9:00 a.m., not old.

15th June
A nice fine day, went out at time on the hill.
To Bathgate, saw Mrs. McCallum, Mrs. McGlone, Mr. McCorquodale, Mr. McPhail, Mr. Stewart, Mr. McPhee, Mr. McEwan, Mr. McNaughton, Mr. McMillan, Mr. McRae, Mr. MacIntyre, Mr. McLean, Mr. McNaughton, Mr. McLean, Mr. McRae, Mr. McEwan, Mr. McCorquodale, Mr. McPhail, Mr. Stewart, Mr. McPhee, Mr. McNaughton, Mr. McMillan, Mr. McRae, Mr. MacIntyre, Mr. McLean, Mr. McNaughton, Mr. McMillan, Mr. McRae, Mr. MacIntyre, Mr. McLean.
17th June '59. Variable weather, strong NW wind, but considerable sun shining after midday, mist in morning & now drizlling at home in afternoon. Brought up to Quainton to look over by invitation of the owners. Visited Anerley & Quainton for a morning & now returning home. Spent the rest of the time in looking at various plants, among them a six foot high blackcurrant. W. of north of W. Donbriar, where a Mr. H. Bebb discovered the American plant Hydrangea macrophylla. A few years ago I found it in a field in one of my parks (Mr. Bebb being at hand to point it out to him!). A very hardy, but almost never flowers. The seed, which includes much fruit of Polygonum bistorta, Hippomnemum, Hypericum, Salis repens, Cowan's phlox, &c.

On the way back the road took us near the following keen:

- Cephalotus, very rare.
- Abutilon abbreviatum, common.
- Aconitum, rare.
- Poppy, rare.
- Bellis perennis, rare.
- Urtica resinosa, common.
- Lamium roseum, rare.
- Aconitum, rare.
- Aconitum, rare.
- Euphorbia, rare.

Crossing over the W. of H. Bebb's house, I stopped for a few minutes at the Cookham Bridge, an attractive place, but a little neglected. A very pleasant evening, & spent the rest of the evening at the Cookham Bridge and some of the places mentioned.
17.6.57, cont. - During the day I finished the task of
36 Kokachina exposures
+ postcards th following evening
15th June. Left Old Head about 10 A.M. & drove
to Ballinlough near Larne & Ballaghaderreen
where W.B. Allen & 8 searched for Brecks & Brecks
machine & found plenty of them but no signs of flowering
- some types of Brecks around Larne. They were
very rare. Various forms of Brecks brought
away in little bags & sent to F. & Brecks
also seen about the loughs were plenty of brecs (not coming
the Flower) & Brecks menaion were seen in the area.
Photos of the lough & Brecks close up
taken at small house near on N. side of lough.

After lunch we came to Salthill (stayed at the Hotel Rd)
via Salthill, Ballylough, Spiddal & west road.
The coast collected a few spiny Brecks (8 b. capillaries)
at Ballymoneboy. Also many species of
carnivorous were seen, including a very small one - possibly
bog tiger, but...
19th June 59. After a dull dark morning a very hot & sticky morning. Too hot for me a milk small pencil: hypnotized by Skelton shortly after, 9.15 at London. 1,20 at Baldry. Called at the inn, Black Head & Bellinabracka Castle Hall (where I had ordered coach for 1 P.M.). At 2.15 we went on to the Cliffs of Moher & spent nearly an hour there on the head to Black Head for afternoon tea. Left Black Head at 6 P.M. & at Skelton at 7.15 in time for high tea.

19th June 59. Left coach at 3 : Black Head in Cl.,

2 = Sandycroft near coach at 1,30-12.00 Morn.

3 = Sold marl, 1/2 behind stone break, between road & sea,

Skelton all day. 12.15-12.45 Morn.

3 a = Between road & sea, 1/2 miles of Black Head. 4.30. 6.00.

Protozoa 5.5, including 3 Entocapsa

Chelidae, no. 30
Sea-fish or 2 flounders (blackly)

Only took 3 fish. Coming of T. T. Film 2 min. 15 sec.

21 June. Sunday. Blown up things in forest, but after lunch Mr. Railly drove us all to Gleniff. As it was raining we took the car and drove over the mountain road. A cloudy day (5B) for work to my farm. Collecting insects, ferns, worms and birds. Took four photos of "Oenothera (13)" and the letter of a pair of "Hymenoptera" from my friend in the Neale. A storm at 3PM, coming near the "second school". Mr. Railly a friend of the miners, back to the old shanty. Begun to clear the old main ridge. Found only two small plants of "Brasenia silvatica" and only half of the new Zealand "Euphorbia esula". Every day very dry and hot. Planted a row of box and sea cucumbers not yet in flower. Two red lilies or "Tulipana", not yet in flower. 6 Euphorbia, each 50. Looking for leaves, seeds about in middle of algae.

Euphorbia esula Holz., 5, col. 28
6 Euphorbia, each 50. Looking for leaves, seeds about in middle of algae.
23. June 1959. After rain earlier in the day wind about 11 a.m. a very fine afternoon evening a wind west from S.W. to N.W. Very hot warren 8 P.M. cent. felt round a very very day but not very dry; made an upwind canoe paddle difficult even later.

Left Barrowsea about 10 30 a.m. 1st seen. The gale nearly filled the attack of the boat. No. 14 little moment (11). Late dinner on 6 travels o'clock. I had two bottles about 2 1/2 hours. round, but not very wet after going in willer after the gale died down. Evening took 6 photos. I found 36 exposures film on 1st plate. On was 20 magic Mather. Black camera telescope. Fought 2 rolls in Barrowsea later.

Traveling looking across Tongue Bay to Glimmer. 

24. 6.59, cont. Traveling on S.S. 4 to the 6.30 P.M.

= 2.

Anchorage opposite to the S.S. also 300 yards NW. 

Traveling looking across Barrowsea to Glimmer.
25th June 1959. Another very hot, sunny day with SW wind.

Drum by Mr. Gately first to Knockmorey Glen Slige, the

hand line on the shore of Ballygadmore Bay. The fish

now made a run to shore, reports of salmon and

mackerel. E. L. I. But did not see any fishing in a second it

passed. Fished en route in shallow water of low buoy

at it. Off again to English Channel. Ballygadmore +

belonging to Lough Tollemore, some collected from 2 to

3:20 PM. Stay away on the road, then in the evening, back

to shore of Lough Gill SL, off foot of Still Gap etc. Here

left afternoon to 8 late night. Many salmon. Left

Lough Gill at 5.50 & home 6.45 PM.

Knockmorey Glen Co. Sl. 12 noon till 1.00 PM.

24th June 59. Another very fine, hot, sunny day, but glass feeling a little strange in spring. Began to want to refresh, so we decided to return to Bundoran where we found a most pleasant place for dinner. A good view of the cliffs and a delightful evening. We returned to Bundoran and went back to our hotel. Mr. D. and I had a very nice meal in the hotel.

25th June 59. After rain at night a dull morning, strong gusts between light breezes. Very warm and humid.

Begun by Mr. Boltey to stop by N. of Bundoran. I arrived about 11.30 A.M. Mr. Boltey & I spent the day on the cliffs N of the mouth. We got back to Bundoran I came back from 1.30 P.M. after receiving a long letter. I just before a delicate descended & landed. I had an afternoon tea & drove back to Bundoran. Although, he saw no sign of the famous wild horses on the cliffs. Mr. D. & I was a very nice meal in the hotel.

26th June 59. Left Bundoran at 10 A.M. & arrived at Mr. Boltey's house in Newcastle at 2.30 having travelled via Bundock, Dock, Tullibrod, Tullie's Bar, S. of Durnan. Then down to, Quinnes, Portmore, Castleside, Rathfriland, Hilltown, & Ballymena. Left for home at 5.30 P.M., and collected the thrown-up ships during the day.

For continuation of their return to Vol. 27 page 91.

1st Nov. 1939. A beautifully sunny, serene afternoon, with a gentle SW breeze, turning cloudy in afternoon, the sky yellowish, some strong winds. Very much. The sun was a blazing yellow, cloudless, fine, rain in back garden, rising from flower of R. roseum. Boghitis achenes, in white. I thought it was rain, but it was after just the same, I saw a bird of Bombay type in flower of J. J. Boome. W. with called me evening, I was settled next which I would end.

22nd Nov. Hall fog, grey sky, very strong, being cleared out. At day, but I was still and I might have been at the afternoon, day or cooler. On yard, in the back garden, about 2 P.M. every Swallow fly around. At hill, a of the old about 20 feet over my head, I was able to see across it to the other, my head, that it is a Swallow's nest, a house, nest, birds. I spent the rest of the afternoon, not sleeping, a good part of the afternoon, N. of the greenhouse, which included many of the rest of the Botanic garden, but the trees and plants, not even disturbed.

23rd Nov. A cold, misty, sunny day, quite sunny, in some sections. 5 and a half hours. I may write a bit more, but I am not well. I did not write at all.

24th Nov. A cold, still, sunny day, quite sunny, in some sections. A good day, clear. I did not write at all.

25th Nov. A cold, misty, sunny day, quite sunny, in some sections. A good day, clear. I did not write at all.

26th Nov. A cold, misty, sunny day, quite sunny, in some sections. A good day, clear. I did not write at all.
14th Nov. 1879. Gold was driven in among a light native mind.
Aforenoon I took the young timber to the store, and it had been
meant to leave it with some care. It was a mild kind
During afternoon I was quite busy planting the young
branches, and in some places beyond a furlong. I was trying to get
the rest of the branches into the air. I was afraid that the south
and north were not as far apart as they should be.
Examples from E. 40 Aults. 20 Aults. 10 Aults.

15th Nov. Sunday. Odd but very pleasant. No W. Snow at
all today. In the morning more mending of fences a little.
In the evening, some work on plantation E. of the main.
16th & 17th. More. Cold this morning and all day, very cold, 16, 17.
19th Nov. 59. Rare in each part of the night. Filled up by 10 a.m.

Dry period, nice weather & pleasant, but cold wind. 12

R. Pontica, 1 Azalea pontica, 1 Azalea burgonii, 1 Azalea glaucum, 1 G. repens, 1 Daboecia angustifolia

The two Rhododendron's after being in the garden for 3 weeks, are now in flower. 21st Nov. The wind has been more northerly. Had a cold

27th Nov 1959 Sunday. A cold, but very nice day, with wind from SE. Jim married in the morning, a clear blue sky, cloudless, with a fresh breeze. The weather was fine and the sun shone bright. We went to the beach and had a good swim. In the evening we went to a dance at the Pavilion. We had a good time and enjoyed ourselves. Jim and I went back to London by train. We had a pleasant journey and arrived safely at Paddington Station. We then went to our hotel and had dinner. After dinner we went to the cinema to watch a film. We had a good time and enjoyed ourselves.

5th December 1959. After a good night's sleep we visited the National Gallery in the morning. We saw many interesting paintings and sculptures. We then went to the Tate Modern to see the latest exhibition. We had a good time and enjoyed ourselves. In the afternoon we went to the British Museum to see the Egyptian mummies and the Roman statues. We had a good time and enjoyed ourselves. In the evening we went to the Royal Albert Hall to see a concert. We had a good time and enjoyed ourselves.
9th Dec. 1939. After a very cold, wintry night with a strong wind from ESE to S. Snow fell all day with E to SE wind, moisture to gather. Snow fell on and nearさま, 7th Dec. 1939. Bright, sunny, and good weather during the period till 6:30 P.M. The sky was blue and clear, and the sun shone brightly. The wind was brisk and cold. Very little light rain during the day. A cold day ended.

9th Dec. The cold, dry, and bright weather from the 8th continued. Bright, sunny, and very fine. The wind was brisk and cold. There was very little light rain during the day. A cold day ended.

10th Dec. A very cold, wintry night with a strong wind from ESE to S. Snow fell all day with E to SE wind, moisture to gather.

11th Dec. After a very cold, wintry night with a strong wind from ESE to S. Snow fell all day with E to SE wind, moisture to gather.
26th Dec 1959. A cloudy day, with strong to gale SW wind, warm day, down. Small little rain falling; no Tides Turning. Afternoon, I called on Mr. Guinness, who had recently been hospitalized at the hospital due to illness for an operation.

27th Dec. A very cold day, with strong easterly wind; with heavy rain. But, in the evening, the weather turned to the north of the wind, and it cleared up a bit, leaving only a few spots of rain. In the evening, I went for a walk at the town.

27th Dec. A very cold day, with strong to gale SW wind, warm day, down. Small little rain falling; no Tides Turning. Afternoon, I called on Mr. Guinness, who had recently been hospitalized at the hospital due to illness for an operation.

28th Dec. A very cold day, with strong easterly wind; with heavy rain. But, in the evening, the weather turned to the north of the wind, and it cleared up a bit, leaving only a few spots of rain. In the evening, I went for a walk at the town.

29th Dec. A very cold day, with strong easterly wind; with heavy rain. But, in the evening, the weather turned to the north of the wind, and it cleared up a bit, leaving only a few spots of rain. In the evening, I went for a walk at the town.

30th Dec. A very cold day, with strong easterly wind; with heavy rain. But, in the evening, the weather turned to the north of the wind, and it cleared up a bit, leaving only a few spots of rain. In the evening, I went for a walk at the town.

31st Dec. A very cold day, with strong easterly wind; with heavy rain. But, in the evening, the weather turned to the north of the wind, and it cleared up a bit, leaving only a few spots of rain. In the evening, I went for a walk at the town.
1960.

1st January 1960. A very nice, clear, dry day, with wonderful sun shine. The moon is new, as the new moon, after a dry night. Cold!

2nd Jan. E wind, not too much. A slight drizzle in the evening, with wind dropping to 50 mph. Field.

3rd Jan. After a dry day, mild night. Snow fall in amount about 1/30 of 1 inch. Snow from SE, a very heavy snow, and mixed S E snow. Clear weather, no rain fall. A good night, with heavy snow fall at 9 p.m.

4th Jan. A heavy snow fall all afternoon and evening. No field work.
19th January 1960. After a very bright and fine day a slight drizzle started about 9am. The cloud was dispersed in the afternoon and the sky was very clear. The record temperature was 1°C. At night, a slight fall of snow before bed time. In the evening we walked through the plantation to the house. The weather was very cold and we wore coats and hats. We walked to the edge of the garden and looked out to sea. The sky was very clear and the stars were shining brightly.

20th Jan. The mood of the weather felt very similar to yesterday, with a slight drizzle in the morning and clear skies in the afternoon. The sky was very clear and the stars were shining brightly. We walked to the edge of the garden and looked out to sea. The sky was very clear and the stars were shining brightly.

22nd Jan. After severe gales with heavy rain and strong gales with strong gales force 4 to 5. Very mild to hill, observed 10.30am on the coast.

23rd Jan. After another wet night, a very mild day, with variable wind and light rain. Cloudy in afternoon, but very clear in the evening. We walked to the edge of the garden and looked out to sea. The sky was very clear and the stars were shining brightly.

24th Jan. A very nice day, a sunny, mild day.

25th Jan. After a short spell of rain about 11am, a very sunny afternoon, but an increasing easterly wind made the afternoon much colder. Towards evening, a moderate gale from the east, but in the morning, a strong S.E. wind. We walked to the edge of the garden and looked out to sea. The sky was very clear and the stars were shining brightly.

26th Jan. After a short spell of rain about 4pm, a very sunny afternoon, but an increasing easterly wind made the afternoon much colder. Towards evening, a moderate gale from the east, but in the morning, a strong S.E. wind. We walked to the edge of the garden and looked out to sea. The sky was very clear and the stars were shining brightly.
28th Jan 1960. A cold day, with strong, very cold S. wind.
A slight frost in the morning. A cold wind, with occasional
snow showers. At night, heavy snowfall. Air temperature
-3° C. Sky cloudy.

29th Jan 1960. A cold day, with strong S. wind. Air temperature
-3° C. Sky cloudy.

30th Jan 1960. A cold day, with strong S. wind, air temperature
-4° C. Sky cloudy.

1st Feb 1960. A cold day, with strong S. wind. Air temperature
-5° C. Sky cloudy.

2nd Feb 1960. A cold day, with strong S. wind. Air temperature
-6° C. Sky cloudy.

3rd Feb 1960. A cold day, with strong S. wind. Air temperature
-7° C. Sky cloudy.

4th Feb 1960. A cold day, with strong S. wind. Air temperature
-8° C. Sky cloudy.

5th Feb 1960. A cold day, with strong S. wind. Air temperature
-9° C. Sky cloudy.

6th Feb 1960. A cold day, with strong S. wind. Air temperature
-10° C. Sky cloudy.

7th Feb 1960. A cold day, with strong S. wind. Air temperature
-11° C. Sky cloudy.

8th Feb 1960. A cold day, with strong S. wind. Air temperature
-12° C. Sky cloudy.

9th Feb 1960. A cold day, with strong S. wind. Air temperature
-13° C. Sky cloudy.

10th Feb 1960. A cold day, with strong S. wind. Air temperature
-14° C. Sky cloudy.

11th Feb 1960. A cold day, with strong S. wind. Air temperature
-15° C. Sky cloudy.

12th Feb 1960. A cold day, with strong S. wind. Air temperature
-16° C. Sky cloudy.

13th Feb 1960. A cold day, with strong S. wind. Air temperature
-17° C. Sky cloudy.

14th Feb 1960. A cold day, with strong S. wind. Air temperature
-18° C. Sky cloudy.

15th Feb 1960. A cold day, with strong S. wind. Air temperature
-19° C. Sky cloudy.

16th Feb 1960. A cold day, with strong S. wind. Air temperature
-20° C. Sky cloudy.

17th Feb 1960. A cold day, with strong S. wind. Air temperature
-21° C. Sky cloudy.
16 Feb 1960. Another freezing cold day. Snow fell all day. Snow piled up on the roof and windowsills. The wind was howling. Visibility was very poor. Daytime temperatures were around 0°F.

17 Feb 1960. A very frosty night with a heavy frost. Snow fell all night. The sky was clear. Daytime temperatures were around 10°F. The wind was howling. Visibility was very poor. Daytime temperatures were around 0°F.

18 Feb 1960. A very frosty night with a heavy frost. Snow fell all night. The sky was clear. Daytime temperatures were around 0°F. The wind was howling. Visibility was very poor. Daytime temperatures were around 0°F.
21st Feb 1936. After a day's gentle rain, with drifting to
sleet and snow, a later moderate northeast wind, a
glimpse of blue sky, Sunday. In afternoon, snowing
light, snow drifts over to the road, snowing on the glen, from a
constant gale. Rain fell heavily, the wind in a southerly
the fall. Some snowing, rather light, still snowing. 3 hours
30 mins. More heavy snowing, light to snowing.

Snow still on a plowed snow drift, thickness of 3/4
bush. A strong north wind with 30 miles per hour. The road
the better a lot, it has improved a lot, it has into
the 2nd hour and the 3rd hour, especially in wood
trees. With the snow, it was quite a
22nd Feb. After another heavy snowfall, a very nice day with
a good deal of warm sun and a very light wind, mainly south
and south west. NW N N W, N W, NE W. Almost all
plowed snow with a plowed snow drift. Snowing thicker
in forest, though still cold and cloudy. No
3rd day. Just back from 30 mins. Snowing from snow, 30 mins.
S W drifts, snowing on
S W drifts, 30 mins. Snowing on.
S W drifts, snowing on. Snowing on the garages.
S W drifts, snowing on. Snowing on the garages.

23rd Feb. After a good snowfall, a very sunny day, with light SW
snow. Was snowing again till 4:00 PM, so that the total
afternoon heat was not a real in the month. As of
the snow, it was snowing.
24th Feb. After a snowfall. A very nice day, with light SW
S W drifts, snowing on. The snowing was light.
3rd day. After a good snowfall. After a snowfall, a very nice day, with light SW
S W drifts, snowing on. The snowing was light.
4th March. After a snowfall. A very nice day, with light SW
S W drifts, snowing on. The snowing was light.
5th March. After a snowfall. A very nice day, with light SW
S W drifts, snowing on. The snowing was light.
4th March 1960. Stated similar to that for 3rd. But at 2.30 p.m.,
the fog cleared and it was much calmer, although there
was still a slight breeze. It was very cold and a very
strong wind. However, there was no snow.
10th March. We had a very clear day with a strong wind.
11th March. We had a very clear day with a strong
wind.
12th March. We had a very clear day with a strong
wind.
13th March. We had a very clear day with a strong
wind.
14th March. We had a very clear day with a strong
wind.
15th March. We had a very clear day with a strong
wind.
16th March. We had a very clear day with a strong
wind.
17th March. We had a very clear day with a strong
wind.
18th March. We had a very clear day with a strong
wind.
19th March. We had a very clear day with a strong
wind.
20th March. We had a very clear day with a strong
wind.
21st March. We had a very clear day with a strong
wind.
22nd March. We had a very clear day with a strong
wind.
23rd March. We had a very clear day with a strong
wind.
24th March. We had a very clear day with a strong
wind.
25th March. We had a very clear day with a strong
wind.
26th March. We had a very clear day with a strong
wind.
27th March. We had a very clear day with a strong
wind.
28th March. We had a very clear day with a strong
wind.
29th March. We had a very clear day with a strong
wind.
30th March. We had a very clear day with a strong
wind.
31st March. We had a very clear day with a strong
wind.
22nd March 1960. A most fine and very steady rain all day, with occasional mist. In the afternoon, a steady, warm south-easterly wind, which continued to blow for the rest of the day. Cold, but rain caused by a warm front from the Atlantic.

23rd March. Back to the SE. Cold and very much foggy all day, with occasional mist. SE wind, which continued to blow all day, with some mist.

24th March. Cloudy, but very sunny. Strong south-easterly wind, with occasional mist. Warm, but not very sunny. A warm front from the Atlantic.

25th March. Another very fine day, with sun, but very strong south-easterly wind, which continued to blow all day, with occasional mist. Warm, but not very sunny. A warm front from the Atlantic.

26th March. A very fine day, with sun, but very strong south-easterly wind, which continued to blow all day, with occasional mist. Warm, but not very sunny. A warm front from the Atlantic.

27th March. A very fine day, with sun, but very strong south-easterly wind, which continued to blow all day, with occasional mist. Warm, but not very sunny. A warm front from the Atlantic.
26th March 60. A nice dry, sunny day, that is unusual. Potted on small plant in pot 1/2 of the Raspberry, with "blue" potato. Tomatoes in flower for first time in spring.

27th March. A fine bright dry day, but very cold NW wind of strong intensity, Sunday. Very nice a gentle breeze.

3rd April. A very cold day, with snow, snowing, however. Cornish, 17, Irish, very slow. Snowing all day. Some little snow on front gardens. Tomatoes in flower; other flowers, still slow. Very little activity.

3rd April. After a very dry night, with strong SE wind till late afternoon when wind changed to very cold and it rained. A very fine day. Very fine day. Afternoon. Very fine day. Afternoon.

4th April. After a very dry, sunny day, with strong SE wind till late afternoon when wind changed to very cold and it rained. A very fine day. Very fine day. Afternoon. Very fine day. Afternoon.

3rd April. After a very dry, sunny day, with strong SE wind till late afternoon when wind changed to very cold and it rained. A very fine day. Very fine day. Afternoon. Very fine day. Afternoon.
4th April 1960. A very mild & wet April after a rather cold & wet March, but there was quite a thaw which occurred at 2 P.M. & continued intermittently all evening. I came in with quite a wind & rain outside.

5th April 1960. A very mild & very fine weather after a rather cold & wet April. But there was quite a thaw which occurred at 2 P.M. & continued intermittently all evening. I came in with quite a wind & rain outside.

6th April 1960. A very mild & very fine weather after a rather cold & wet April. But there was quite a thaw which occurred at 2 P.M. & continued intermittently all evening. I came in with quite a wind & rain outside.
14th April 1960. The sky very cloudy all morning and with light and occasionally heavy rain. The sky cleared up in afternoon and bright enough to read but in evening the rain set in again.

15th April 1960. Very cloudy in morning. The sky in east much brighter than in west. Clouds clearing after 3 PM. A very bright day but a dull evening.

16th April 1960. A very wet morning. The sky cleared up in afternoon. Sun breaking through at 2 PM.

17th April 1960. Very wet and cloudy throughout the day. Very dark and wet weather with occasional showers.
22nd April 1940. An entirely dull, cold day, with keen N. breeze all day, except during light sunshine between 8 & 9 a.m.

23rd April. A very nice, mainly sunny day, with light N.W. breeze after a cold night. In afternoon I visited 6 gardens, my main interest being Broadlands Road, where gardeners open to visitors to help national fund. At one, called 'The Garden House', the road to Shorne Mill, I bought 2 large ferns, 2 bed, 2 pots, 1 large roll of mown grass, 2 azaleas rise, 1 upright, 1 flat, 1 leaf and a 4 ft. roll of matting.

24th April. After a cold dull day with chilly breeze, wind from N. by N.E.

25th April. Another very dull, cold, windy day with S. by N.W. breeze. Gardeners not working at own gardens, but doing odd jobs instead. Ventnor has 200 miles of boundary wall & hedges, 100 miles of garden, and 100 miles of hedges, as well as 100 miles of gardens.

26th April. Very wet all day with keen breeze from N.E. by E. Very hard on seedlings, moss plants, etc. Felt like a long winter, an enemy to new plants. Fierce frosts from yellow juices and frosty, the one flower bed, Geranium alpinum in flower.

27th April. 1940. Another dull, cold day. In afternoon I visited 6 gardens, mainly SE. Very hard on seedlings, moss plants, etc. Felt like a long winter, an enemy to new plants. Fierce frosts from yellow juices and frosts, the one flower bed, Geranium alpinum in flower. So Spotted Wood is Small white, with 2 cross, 4 with 'Veronica orientalis' in flower. 2 in each garden.
2nd May 1960. After a rainy morning a bright day occurred. Met the piano tuner about 11 a.m. Then, by car to \textit{Shewam} and met my brother and sister in law. They had been there for several days. Late dinner at 	extit{Shewam} at about 7 p.m.,\textit{Shewam} was very pleasant. 

[Handwritten text continues on the page]
12th May 1960

After a fine early morning, I awoke at breakfast time. A few house sparrows were singing in the garden, and continual "whistling" SE wind. A real south-easter, with English weather - cloud covering the hill so that all light and afterglow were very poor. I tried out the setting my camera for first time for some weeks.

13th May

A very strong south-westerly wind, with steady rain and a very strong south-westerly wind, with steady rain and a very grey sky. I tried to get the setting for the first time for some weeks.

14th May

A very strong south-westerly wind, with steady rain and a very grey sky. I tried to get the setting for the first time for some weeks.

15th May

A very strong south-westerly wind, with steady rain and a very grey sky. I tried to get the setting for the first time for some weeks.

16th May

A very strong south-westerly wind, with steady rain and a very grey sky. I tried to get the setting for the first time for some weeks.

17th May

A very strong south-westerly wind, with steady rain and a very grey sky. I tried to get the setting for the first time for some weeks.

18th May

A very strong south-westerly wind, with steady rain and a very grey sky. I tried to get the setting for the first time for some weeks.

19th May

A very strong south-westerly wind, with steady rain and a very grey sky. I tried to get the setting for the first time for some weeks.

20th May

A very strong south-westerly wind, with steady rain and a very grey sky. I tried to get the setting for the first time for some weeks.

21st May

A very strong south-westerly wind, with steady rain and a very grey sky. I tried to get the setting for the first time for some weeks.

22nd May

A very strong south-westerly wind, with steady rain and a very grey sky. I tried to get the setting for the first time for some weeks.

23rd May

A very strong south-westerly wind, with steady rain and a very grey sky. I tried to get the setting for the first time for some weeks.

24th May

Expend 5, woman rest 1.

20th, midge 4.

31st May 60. A very nice day, but mostly dull till about 3.30 p.m., after 5.30 mainly sunny, very nice.
Left Kessassie at 10 A.M. - About 2,30 p.m. diving - 2 dogs.
Left Thaboug a Decapek 2 times, via Kilocmena,
Hindouwane + E. Cape I. Sheen. Thaboug, down the Baker Valley 2 hours via Black Head + Bellyand.
Stopped to examine H. Place en Stehally. Selfley Hill, rent stopped at Thaboug 4 spots in hour. In bed of the day, bitter, hard climb at Decapek, stopped several times when Hindouwane + 2 boats + 2 dogs had afternoon tea about 1 mid. 5 at Black Head when spent. Kessassie 5 am. to main canoe; from 4 infection.
Natives intend to cross at Stehally + Selfley Black Head, but will not do. Indians went home. There still are flowers but mainly in need. Made camp for very fine.
1st June 1960. A day of thick drizzle with SW wind & rain. 

Left Kinnaird & drove to Grant (all in S. Galley) then W to Ballinricket where N to townland of Knockanevane, in Co. Clare to see the great area of Potatoes planted S of Kinnaird. Discovered in Aug. 1955 & found it just in May 60. (2nd time place (W of road) came one & Viera stagnina (2) with other interesting plants.

Then to Rinnarone Lough W. of Ballinricket & round W. side of Inishnair Lough, there had been a car. By Rinnarone Eished G. of Ballylaugh & a small Yellow Sedge (2), C. Loxes (2), C. Tussocks (2) & C. Luzula (2). Visited 1st time the night before now in 1955.

From Inishnair L. W. for a couple of miles & then turned N on Rafferty road E to townland of Knockanevane Castle N of Ballygarran. Stopped to see new Ballygarran & some ditched crops, 2 W. of road & some ditches & some slurry fields & grass (2). 

Then to Dargle Lough W. of Townland of Knockanevane, then to see the first time new Ballygarran & some ditched crops, 2 W. of road & some ditches & some slurry fields & grass (2). From Ballygarran we turned W. to Carrickard of Howth & drive to Killybegs, witnessed N of Ballygarran there was W. of Carrickard & W. of Place. Failed to find any flowers to see Orchis Flycatcher & van. Tullies. 

16.40, left. 

Kinnaird, Co. Clare, and 

After edge of afternoon we drove home to Kinnaird. Meals in arriving at 5.45, being arrived 6.30. During the day we were collecting species all day. 

2nd June 1960. After a damp night, very fine weather many days. 

Left Kinnaird N. Kinnaird, at 9.30 a.m. out to 3.20 when the road was through a rocky gorge (2) on our return) 

From Kinnaird, N. Kinnaird, at 9.30 a.m. out to 3.20 when the road was through a rocky gorge (2) on our return)

5th June '60. Sunday.

Aforenoon went walked to Old Head taken a stone and track through the woods. Collected Sagina on the pine wall. A more stone for the Fitzgerald.

In the afternoon drove to Mr. Ballin's on Blue Wells and walked over Delfri, and a hill near Delfri, collected Sympylotus for L. Fitzgerald, in return collected wood at Delfri, then used Myrtillus (catch) on rock at tree top.

In the afternoon took a large chalice (Chalice virginiana) off under side of eucalyptus tree at Old Head Hotel.

In the afternoon a "rich" (Cibotium) in woods, as "rich".

3rd June '60. Drove to Rossanion, S. of Skibbereen. Went to search in rain for Fitzgerald. Collected Pyramidalis. Next a "rich" (Cibotium) in woods, as "rich".

6.6.1960. Collected Pyramidalis near the Kenmare river. To Mr. Ballin's, I called for Fitzgerald, and saw 5 stones of the "Pyramidalis". He was not much impressed with the many stones, only a few bits in hand. But he said "I always think of Fitzgerald, some Eucalyptus Littoralis, not a patch of this thing."

In the afternoon, Mr. Ballin showed me a grove of thinnest wood behind the hotel at Old Head.

Collected Sympylotus at Lisslaghmore bridge, and wood of Old Head in evening.

7th June '60. Drove to Tallaghtown = Drogheda of E.A.Q.

And R.D. Ballin at 1st, and Westport in Allandale in the South. After our arrival wind backed from S.W. to E.S. and increased after our arrival with heavy rain. Between 4:30 and 5:30 the rain came on in heavy quarters. In the evening we had a light but cool wind from the South.

10th June '60. Went to ball on the beach. Collected "Pyramidalis" near the beach. Left Old Head at 9:30 A.M. and visited Drogheda.

12th June '60. Heavy rain at intervals till 1 P.M., then clear, afternoon, evening. Left Old Head at 9:30. Reached Enniscrone 6:00. Sligo at 12:15. Had lunch in rear. Left in fine condition. Drove via Enniscrone to Sligo and then to Traveline. Sligo. Were stopped for a couple of hours collecting for Fitzgerald, and arrived at Sligo. Found Hotel Sundown in Enniscrone at 5:15 P.M., took the following next at Traveline, etc.
8/6.1930, cont. Travelus, Co. Ship, 3:00 P.M.

9th June 1928. A fine sunny morning day (W).

Brook Stage at 10 A.M., when Mr. Jackson sent it over. The stage had not touched the water. At 2.30 P.M., after lunch, it went to the river to the rear of the bridge. Because it was not started until 2 P.M., 2 hours after starting, it left both the bridge up the river. The bridge was not completed until 2 P.M., and the stage was not started until 2 P.M. Is there any damage to the bridge? No. The bridge was completed in the morning.

Dyssidia: 25° 2' = Ulysses Island 70° 2' = Acheron 8° 2' = Acheron

Abro quadriculatus 4: 1 horned stag, 2 others

Explanations:
- S. of Philip's 21
- 2 delphiniums, 11
- The remainder, 10, 8, 19
- Acheron longipes 10, 19
- Frontpaws 7

The topping is from 11 AM to 4 PM, on the west slope of the SW ridge of the Beacon Hill range, now it forms the N. end of the range. All the area is in Go. Shigh. The results were most disappointing as no plant of interest was seen along the base of the cliff, on the windward side. One little tree of V. macrocarpa (Sierra) of which I found a small branch. Besides this, no new plant of Aciphylla woodland. The ground was rich and great. Rosa spinosissima that is about all. Collected a bag of grasshopper, many up to 3 along base of all steep, lay close to roots.

11th June 1960. A sunny day, with frequent showery 2 PM. A wet night, 2 PM. Very difficult to work in the morning. Drive at 10 AM through Shigh to Long Tobin Kame.

Shigh is rich in the area, no. i. There are many birds, the more interesting. There are three different birds to NE corner of long hill of Shigh. The first is F. Shigh. The other is not so interesting. The one that is interesting is NE corner of long hill of Shigh. It has been here 10 years. The one that is interesting is NE corner of long hill of Shigh. It has been here 10 years.
12th June '60. A severe gale & rain from SE. developed during the night & continued till noon. When wind veered to W., the rain became intermittent. Gales occurred continually all day with heavy showers, but rain continued again in evening. There was heavy fall. Took photos of rough seas at moment period during afternoon.

13th June '60. Spent day driving from Bander dan & Gun emphas, via Rongal, Mount Charles, Gainta, Old loop, Brody, Gunidrome & Tancrass. Took a few shots on route but did not collect. After arrival at Gun emphas we had a tour with long edge of golf links. I collected some seepthos on sand flat (at sea level) of sand, & worked on \( \text{something} \) about 34 ft. W. of Gun emphas.

A day of showers, but thin third out, so did not affect us after 2 P.M.
14th June 1960. A very fine day. all hot sun & quite cool W. NW breeze. Everything looking very beautiful.

A freeman spent 8 hours along outlet of the Neigh lough W. of bridie to horn Head (where collected on 1955) = 14th June. The down at Ard's. was covered at 12.30. I had lunch. After lunch W. Golding & Scandinavian through the woods. Sea breezy, wind SW. and the road from E. to Bay. Returned to Arnolds Hotel at 6.20 P.M. I collected Kaeferia orientalis at the grass, E. of the Bay at the orchid (,) in sand of E. and of the Bay. Also near, an (.) in sand of E. and of the Bay.

Ainert, metaphyllum, an undescribed orchid (including Pterostylis or Lestris congesta.)

A. incoetra. O. quichila, aucuba orca that no un

did E. Japanese seen in 1955. Mr. Balling, reported seeing a small butterfly child of the Burgundy but did not attempt to catch it. He was a rare of it seen having been taken in Ireland.

Andrews with me. To the point of 56.5.43.
Dear Stelfox,

Your specimen arrived safely and I have carefully examined it. I think it must be an aberrant specimen of melanocera. I have seen other examples of this species with swollen temples and I am sorry not to have allowed for this in my revision. The distribution of hairs on tergita (3-8) is as in melanocera not vamnia. I notice there is a trace of rugosity at base of t. (2-9) but I find this occasionally in specimens that I have called melanocera.

I will try to get your other box back to you before the end of the month.

Yours sincerely,

[Signature]
Dear Stelfox,

Your specimen arrived safely and I have carefully examined it. I think it must be an aberrant specimen of melanocera. I have seen other examples of this species with swollen temples and I am sorry not to have allowed for this in my revision. The distribution of hairs on tergite (2+3) is as in melanocera not vaenia. I notice there is a trace of rugosity at base of t. (2+3) but I find this occasionally in specimens that I have called melanocera.

I will try to get your other box back to you before the end of the month.

Yours sincerely,
17th June 1960. Left Drumshanbo at 10.5 AM, travelling via Letterkenny, Londonderry and Dungiven, had lunch near head of Glenarane Gap, Co. Derry, about 1 PM. Then resumed journey via Teacherna, Randalstown, Antrim, Kirklin, and Ballynahinch reached Newcastile home at 4.15 PM. Did not collect anything during journey.

Found 2 packets of红利 rice waiting for me from E.S.A. Boyd for detail see diary under date 26th June 1960. His letter dated 2/VI/60.

18th June 1960. Spent forenoon in garden. In afternoon drove with the Daltons to Silent Valley & up it to the new Ben Brown reservoir where took some photos.
